

Soaring Skies Federation

Dear Seals,

I hope you, and your families, are happy, healthy and having fun.

As we are now approaching the end of the summer term, I would love to see you before school finishes. I have been allocated **Tuesday afternoon (14th July)** for your book collection. If you haven't already done so, you can collect your Year 3 class books, pick up your end of year report, meet your new teacher and see me for a chat before school finishes for your summer break. Your parent/guardian will receive a message with a time slot. You can bring me your home learning books to have a look at if you wish.

If you're feeling like you are not in the **green zone**, we can talk about it and I will try to help you. We will stay at a safe distance across the table and there is hand sanitising gel available.

ZONES OF REGULATION!

Home Learning

This week, I would like you to design space food for astronauts.

The main problem with eating and drinking in space is that there is no gravity. If you let go of a piece of food in a space craft, it will drift around, not fall to the floor. Water won't stay in a cup, it will float out and hang in the air. Food crumbs and drops of water could float around the spacecraft, make a mess or even damage the space craft itself. Therefore, we use special packaging for the food that astronauts will take up in their rocket.

Our Maths focus this week will be telling the time. How confident are you in telling the time?

Have a look at a clock in your house. Is it a digital or analogue clock? Watch the videos and try your best to complete the worksheets. Remember, your family are there to help you if you are unsure. Have a great week Seals!
